Do not have one of these?

That is okay, use one of THESE ^

Start by spreading peanut butter all along the inside of the toilet paper roll using your butter knife

Once done your roll should look something like this

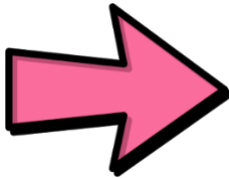

For an added special surprise, you can add 1 or 2 of their favorite treats in the center

Once all filled, fold both ends as best you can to create a little challenge for your pet to reach the center

Viola! Now you have a quick, easy, and yummy treat for your doggo that requires them to work a little bit.

You can make one or make several and put them in the refrigerator for later!
