

Snake Cat Toy

Time: 10 minutes to an hour while paint dries

Materials: Cardboard tubes (toilet paper rolls or wrapping paper rolls), scissors, googly eyes (optional), white craft glue (optional), acrylic craft paint in colors of your choice, crayons or colored pens (optional)

Meant for: Cats

Instructions:

Simply cut the tubes into coils and decorate coils as desired!

Paint or decorate the inside and outside of the cardboard tubes. Use the handle end of a paintbrush to add polka dots. Place coiled cardboard on table. Paint the end with red and let it dry. Meanwhile, glue on googly eyes, applying the glue with a toothpick. Now that the red paint is dry, use some small scissors to snip the red end into a forked tongue. Or, cut a forked tongue from red construction paper, snip the end of the cardboard to cut off the point, and glue that on.
