Our Mission

Our mission is to be an innovative regional leader in the responsible treatment of homeless dogs and cats, primarily through their rescue and placement in loving homes, and by promoting spaying and neutering to control pet overpopulation.

We accomplish our mission with a dedication to our core values and a lifetime commitment to our pets.

SPCA-NN relies entirely on community donations, as we do *not* receive any national nor government funding.

Our Community Programs

Affordable Community Spay & Neuter Clinic

Our on-site affordable spay/neuter services reduce pet overpopulation and keep pets healthy.

Affordable Community Vaccine Clinics

Our vaccine clinics, held every Saturday and Sunday at our Thrift Store, offer affordable vaccinations to keep pets and our community healthy. **Expanding in 2026!**

Todd's Medical Assistance Fund

We provide financial assistance for necessary veterinary care, including end-of-life (EOL) care at home, allowing pets to remain pain-free, healthy, and surrounded by love in the homes they know.

Clifford

Clifford was 17 days old when he arrived at SPCA of Northern Nevada. He was the smallest in his litter and born with a cleft lip that made nursing difficult. He needed extra care to thrive, and thankfully a devoted foster family helped him grow strong.

Despite his challenges, Clifford's playful spirit quickly won over his foster family. His tail wagged endlessly, even when mealtime got messy, and he loved shadowing his big foster brothers, learning how to be a dog.

It didn't take long for his fosters to realize Clifford was already home! They officially made him part of the family and renamed him Groot. Today, he spends his days playing, cuddling, and living the joyful life he was always meant to have—a sweet reminder that every pet deserves a chance to shine.
